

Topping Options from Server Code Quiz Spec

- Use scoops as a model
 - type out rather than copy/paste for better learning
- add handler for `/toppings` route
- Handler can return three toppings:

```
[  
  { name: 'Cherries', imagePath: '/images/cherries.png' },  
  { name: 'M&Ms', imagePath: '/images/m-and-ms.png' },  
  { name: 'Hot fudge', imagePath: '/images/hot-fudge.png' },  
]
```
- Write tests in *Options.test.jsx*
- name option can be `/topping$/i`
- Update *Options.jsx* and create *ToppingOption.jsx*
