

## Optional Toppings on Summary Page Spec

Mockup

The mockup shows a web browser window with the URL `http://sundaes-on-demand.com`. The page has a teal background and contains the following elements:

- Order Summary**: A large heading in white text.
- Scoops: \$6.00**: Text in white, with a radio button and the text "3 Vanilla" below it.
- Total \$6.00**: Text in white.
- ☐ I agree to [Terms and Conditions](#): A checkbox followed by the text "I agree to" and a blue link "Terms and Conditions".
- Confirm order**: A button with a black border and white text.

The browser window has a grey header bar with navigation icons (back, forward, close, home) and a search icon. The page has a grey footer bar with a small icon in the bottom right corner.

## Tests

- Don't display toppings heading on summary page if no toppings are ordered
  - Similar to "final exam happy path" test
- new test, since outcome is different

## Standard Questions

Question	Answer for this Exercise
What to render?	happy path usually means App
Pass props?	No, App has no props
Wrap render?	No, App already wraps within component
Which file for tests?	<i>orderPhase.test.jsx</i> works; moving from one phase to another
What to test?	<ul style="list-style-type: none"><li>• Toppings header is not there</li><li>• Anything else? No hard-and-fast right answers here!</li></ul>
How to test?	Which query to assert something's <b>not</b> on the page?
Do we need to async / await?	Is there anything async going on?
