

Confirm Loading Code Quiz Spec

- Confirmation page is set to show "Loading" while order number is loading from server
 - Update "happy path" test
 - Test "Loading" appears and then disappears
- use query that expects "Loading" not to be there
 - use cheat sheet for reference
 - <https://testing-library.com/docs/react-testing-library/cheatsheet>
- This is not TDD since code is already written
 - didn't want to add this to final exam, so much going on already!
